

INSTANT COOLING EFFECT

Keep it cool, pillow flippers.

There is no need to flip your pillow with this new technology in bedding. Climarelle® Cool Pro features the highest innovation in PCM liners, providing the maximum absorption of thermal heat energy and releasing it, thus providing new cooling surface area and continuously keeping you cool throughout the night.

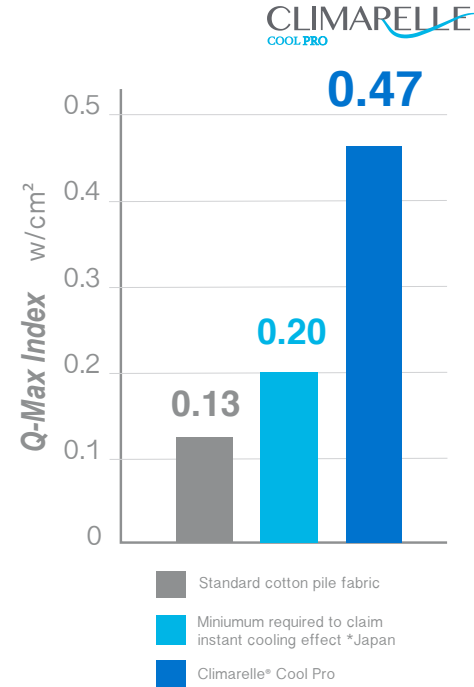

67% COOLER

Climarelle® Cool Pro features a thermoregulatory effect that is 67% + more cool to the touch, making it our top performing PCM non-woven.

Climarelle® Cool Pro features a white on white wave printed pattern that is extra light and soft.

Instant Cooling performance can be measured by the Q-Max Index Test. Climarelle® Cool was tested and measured at 0.47 - confirming very high performance for instant cooling effect. This is the coolest technology because it is instant and also thermoregulating - the perfect balance to keep you comfortable all night.
