

LUXURY FUSION

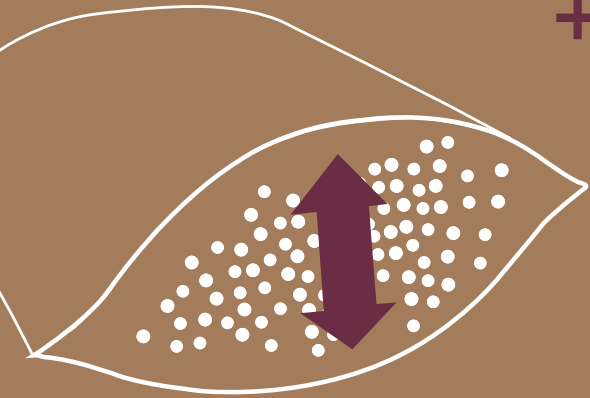

Pairs Sustainable Innovation and Comfort

This fusion of natural down and high-tech polyester provides continuous comfort, created with lasting loft and proven performance. Produced with sustainable Eco2 Technology, developed to respond to consumer aspirations: wellness, nature and respect for the environment.

Designed to mimic volume and support with down filling. It has better moisture transport for improved breathability and may reduce heat build up in pillows.

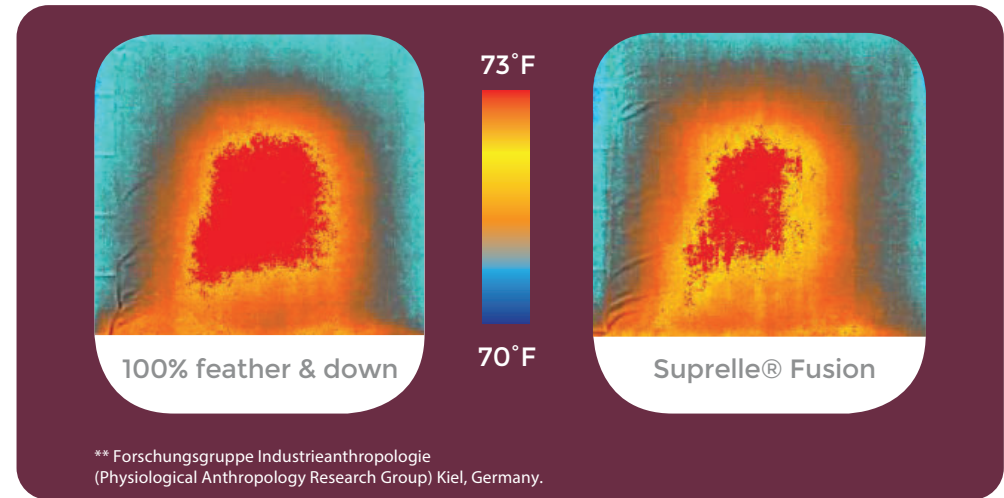

+20%
Superior Bulk

The initial height of a pillow filled with Suprelle® Fusion is greater than a 100% natural pillow.

Independent tests confirm that vapour transport, or “breathability”, of a product filled with Suprelle® Fusion is almost 3 times higher compared to a 100% natural product, thereby providing a dry micro-climate for optimal comfort.

Suprelle® Fusion may improve breathability and reduce heat build up in pillows.

Test carried out in climate chamber at independent laboratory in Germany**
Infrared images taken 10 minutes after sleeper removed head from pillow.
Significant difference in temperature zones from enhanced heat dissipation. (red area > 71.6°F)
