

CLOUD-LIKE COZINESS

Soft and Springy Loft

Featuring an advanced Spiral Crimp Technology that has an innovative 3-D crimping technique for particularly good recovery and lasting comfort. Suprelle® Spring offers extraordinary bulk, optimum softness and stable support.

A new product's initial bulk shows Suprelle® Spring's loft is 28% more than traditional fiber fill and 32% more under pressure.

The initial bulk displayed by Suprelle® Spring is 28% higher than standard polyester fibers

The support bulk displayed by Suprelle® Spring is 32% higher than for standard polyester fibers

Suprelle® Spring can provide excellent warmth retention and stay fluffy without bulky weight in comforters. Additionally, high recovery and exceptional support may ensure an even distribution of weight for mattress toppers and pillows.

Suprelle® Spring has approximately 30% more bulk than traditional polyester fiber fill.
